Scope - Elections Area

The DLANC website requires a new section to provide information about the upcoming elections for the council. A new top level menu item will be created and will link to a page that includes information about the election - locations and times, voter eligibility and boundary maps, etc... Additionally, this section of the site will contain information about the candidates running for the council, including a candidate-provided statement and photo. Wherever applicable, the election section of the DLANC website will link to pertinent areas of the Department of Neighborhood Empowerment website. A QR code that links to the election page will be created so that DLANC can post it on various promotional materials and display it at outreach events.

Scope - Finance Area & Various Improvements

The DLANC website requires a new section to publicly display the council's financial activity. A page will show a reverse chronological list of statements grouped by month and year. Each statement will be a PDF file posted by the council treasurer. A link to this section will appear under the "About" menu on the website.

In addition to this, the site needs various updates and fixes, including the addition of any new working groups and committees, archiving of any disbanded working groups and committees, and some small bug fixes. The VP of Outreach & Communication has also requested an easier workflow and more images to use for the homepage slider, so that it may be more frequently updated.
